

SB 1383: Food Waste and Food Recovery Compliance

ENVIRONMENTAL
INNOVATIONS

We specialize in guiding municipalities through the intricacies of SB 1383, which mandates that municipalities reduce greenhouse gas emissions by decreasing organic waste sent to landfills by 75% and a 20% increase in the diversion of edible food by 2025. Our team of experts will collaborate with you to develop a customized plan tailored to your business community's specific needs, and will ensure that local food banks, waste haulers, solid waste and food facilities align with SB 1383 guidelines. We work with a range of software platforms to document diversions, enabling you to fulfill your reporting obligations.

Why choose Environmental Innovations?

Respected Industry Leader with Strong Partnerships.

We work closely to align food facilities, haulers, food recovery organizations, and municipal staff in the municipalities we assist so that they can quickly meet the mandate and have lasting compliance. CalRecycle has seen our work and recommends us to municipalities that are struggling with this mandate as a cost effective and efficient solution.

Demonstrated Success in Assisting Municipalities with SB 1383.

We have a proven track record of helping non-compliant municipalities achieve compliance with SB 1383 mandates.

Bilingual Program Design and Outreach.

Our bilingual outreach team has extensive experience in designing and implementing programs to assist food facilities and train their employees.

“EI's extensive efforts in SB 1383 outreach, tracking, and reporting has been instrumental in the success of the City of Capitola's overall compliance. We continue to be impressed by EI staff's comprehensive knowledge, professionalism, and clear communication with City staff, residences, and businesses to achieve food waste diversion goals.”

We specialize in providing food facility outreach services to municipal clients, assisting with single-use foodware ordinances, SB 1383 state mandates, organics recycling, and edible food recovery.

SB 1383: Recycling of Organics and Edible Food Recovery

EI leads SB 1383 compliance outreach efforts for the Cities of Capitola, Marina, and Scotts Valley aiding residences and businesses in collecting inedible food waste for recycling and helping to recover edible food for donation, all while handling the tracking requirements of this complex law. EI staff also represent jurisdictions in regional task force committees aimed at increasing edible food capacity, liaises with CalRecycle representatives, ensures overall compliance, and handles the annual reporting requirements via CalRecycle's electronic system.

Foodware Aware and 1383 Compliance

EI currently leads the Foodware Aware campaign in San Mateo County, providing outreach support to thousands of food facilities to ensure compliance with state and local foodware ordinances. Our team also leads outreach efforts for SB 1383 compliance in the county and other municipalities, assisting food facilities in collecting and recycling inedible food waste and recovering edible food for donation, all while tracking volumes for both. Our expertise in foodware issues, strong relationships with stakeholders, and in-depth institutional knowledge make us a trusted partner in the industry.

California Green Business Network

EI serves as the staff for the California Green Business Network and is responsible for overseeing ten individual Green Business Programs across the state. As one of the largest business sectors eligible for certification, our team focuses on helping restaurants become more sustainable, leveraging our established relationships and outreach expertise to break down barriers to change, ensuring compliance with SB 1383 and food recovery mandates.
